Dotplot of top 30 significant GO terms

Top 30 significant GO terms (y-axis):
- transcription, DNA-templated
- RNA processing
- RNA metabolic process
- RNA biosynthetic process
- regulation of transcription, DNA-templated
- regulation of RNA metabolic process
- regulation of RNA biosynthetic process
- regulation of nucleobase-containing compound metabolic process
- regulation of nucleic acid-templated transcription
- regulation of macromolecule biosynthetic process
- regulation of gene expression
- regulation of cellular macromolecule biosynthetic process
- regulation of cellular biosynthetic process
- organic cyclic compound biosynthetic process
- nucleobase-containing compound metabolic process
- nucleobase-containing compound biosynthetic process
- nucleic acid metabolic process
- nucleic acid-templated transcription
- mitotic cell cycle process
- mitotic cell cycle
- macromolecule modification
- macromolecule biosynthetic process
- heterocycle biosynthetic process
- gene expression
- cellular protein metabolic process
- cellular protein localization
- cellular nitrogen compound biosynthetic process
- cellular macromolecule biosynthetic process
- cell cycle process
- aromatic compound biosynthetic process
